DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-18, drawn to methods of producing poly(hydroxy fatty acids) (PHF) with at least one subunit that are dependent upon recombinant bacteria comprising at least one fragment of the PHF synthase gene from *T. pfennigii*, classified in class 435, subclasses 135, 170, 69.1.
- II. Claims 23-30, drawn to PHFs that are obtainable by the methods of Group I, classified in class 554, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions of Group I and Group II are related as process of making and product made.

The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the poly(hydroxy fatty acids) (PHFs) of Group II can be made from other recombinant bacteria or can be isolated from non-recombinant bacteria.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1636

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
